Launch-Ready Website for the College

POWERING THE FUTURE OF COLLEGE ENGAGEMENT

Project Overview

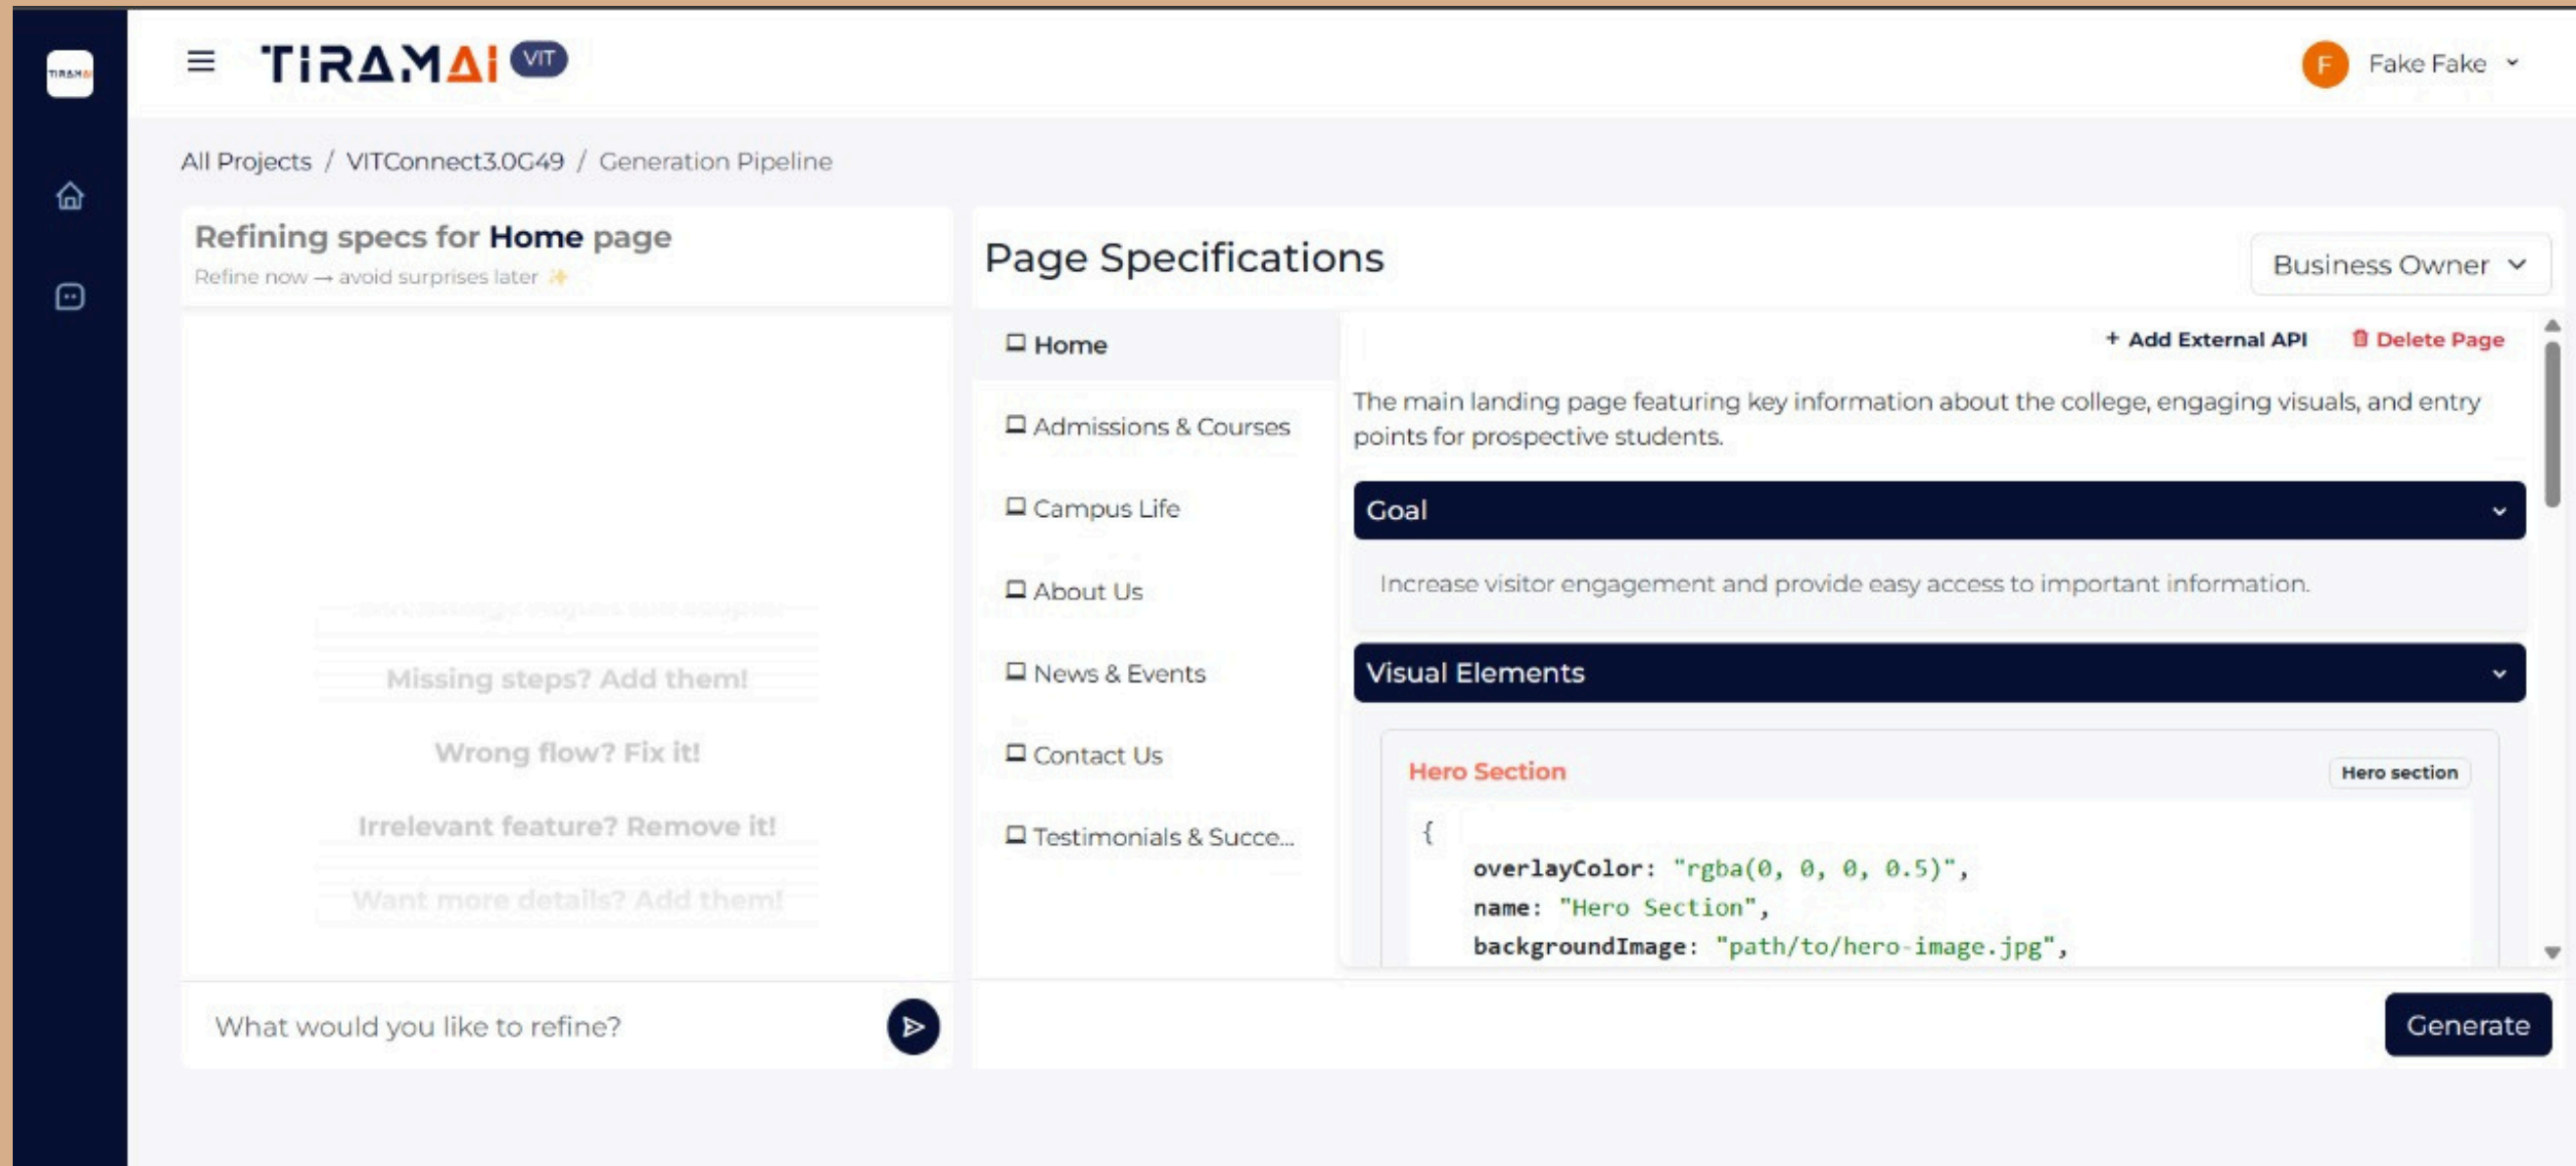

What We Built:

A fully functional, user-friendly college website using Tiram.AI containing the following web pages:

- **Homepage** – Engaging design with the college's vision and highlights
- **About Us** – Detailed insights into the institution, faculty, and values
- **Admissions & Courses** – Clear program details and admission process
- **News & Events** – Dynamic updates and announcements
- **Contact & Inquiry Form** – Easy communication for students and stakeholders
- **Student Life & Facilities** – Showcasing campus activities and resources
- **Testimonials & Success Stories** – Alumni and student achievements

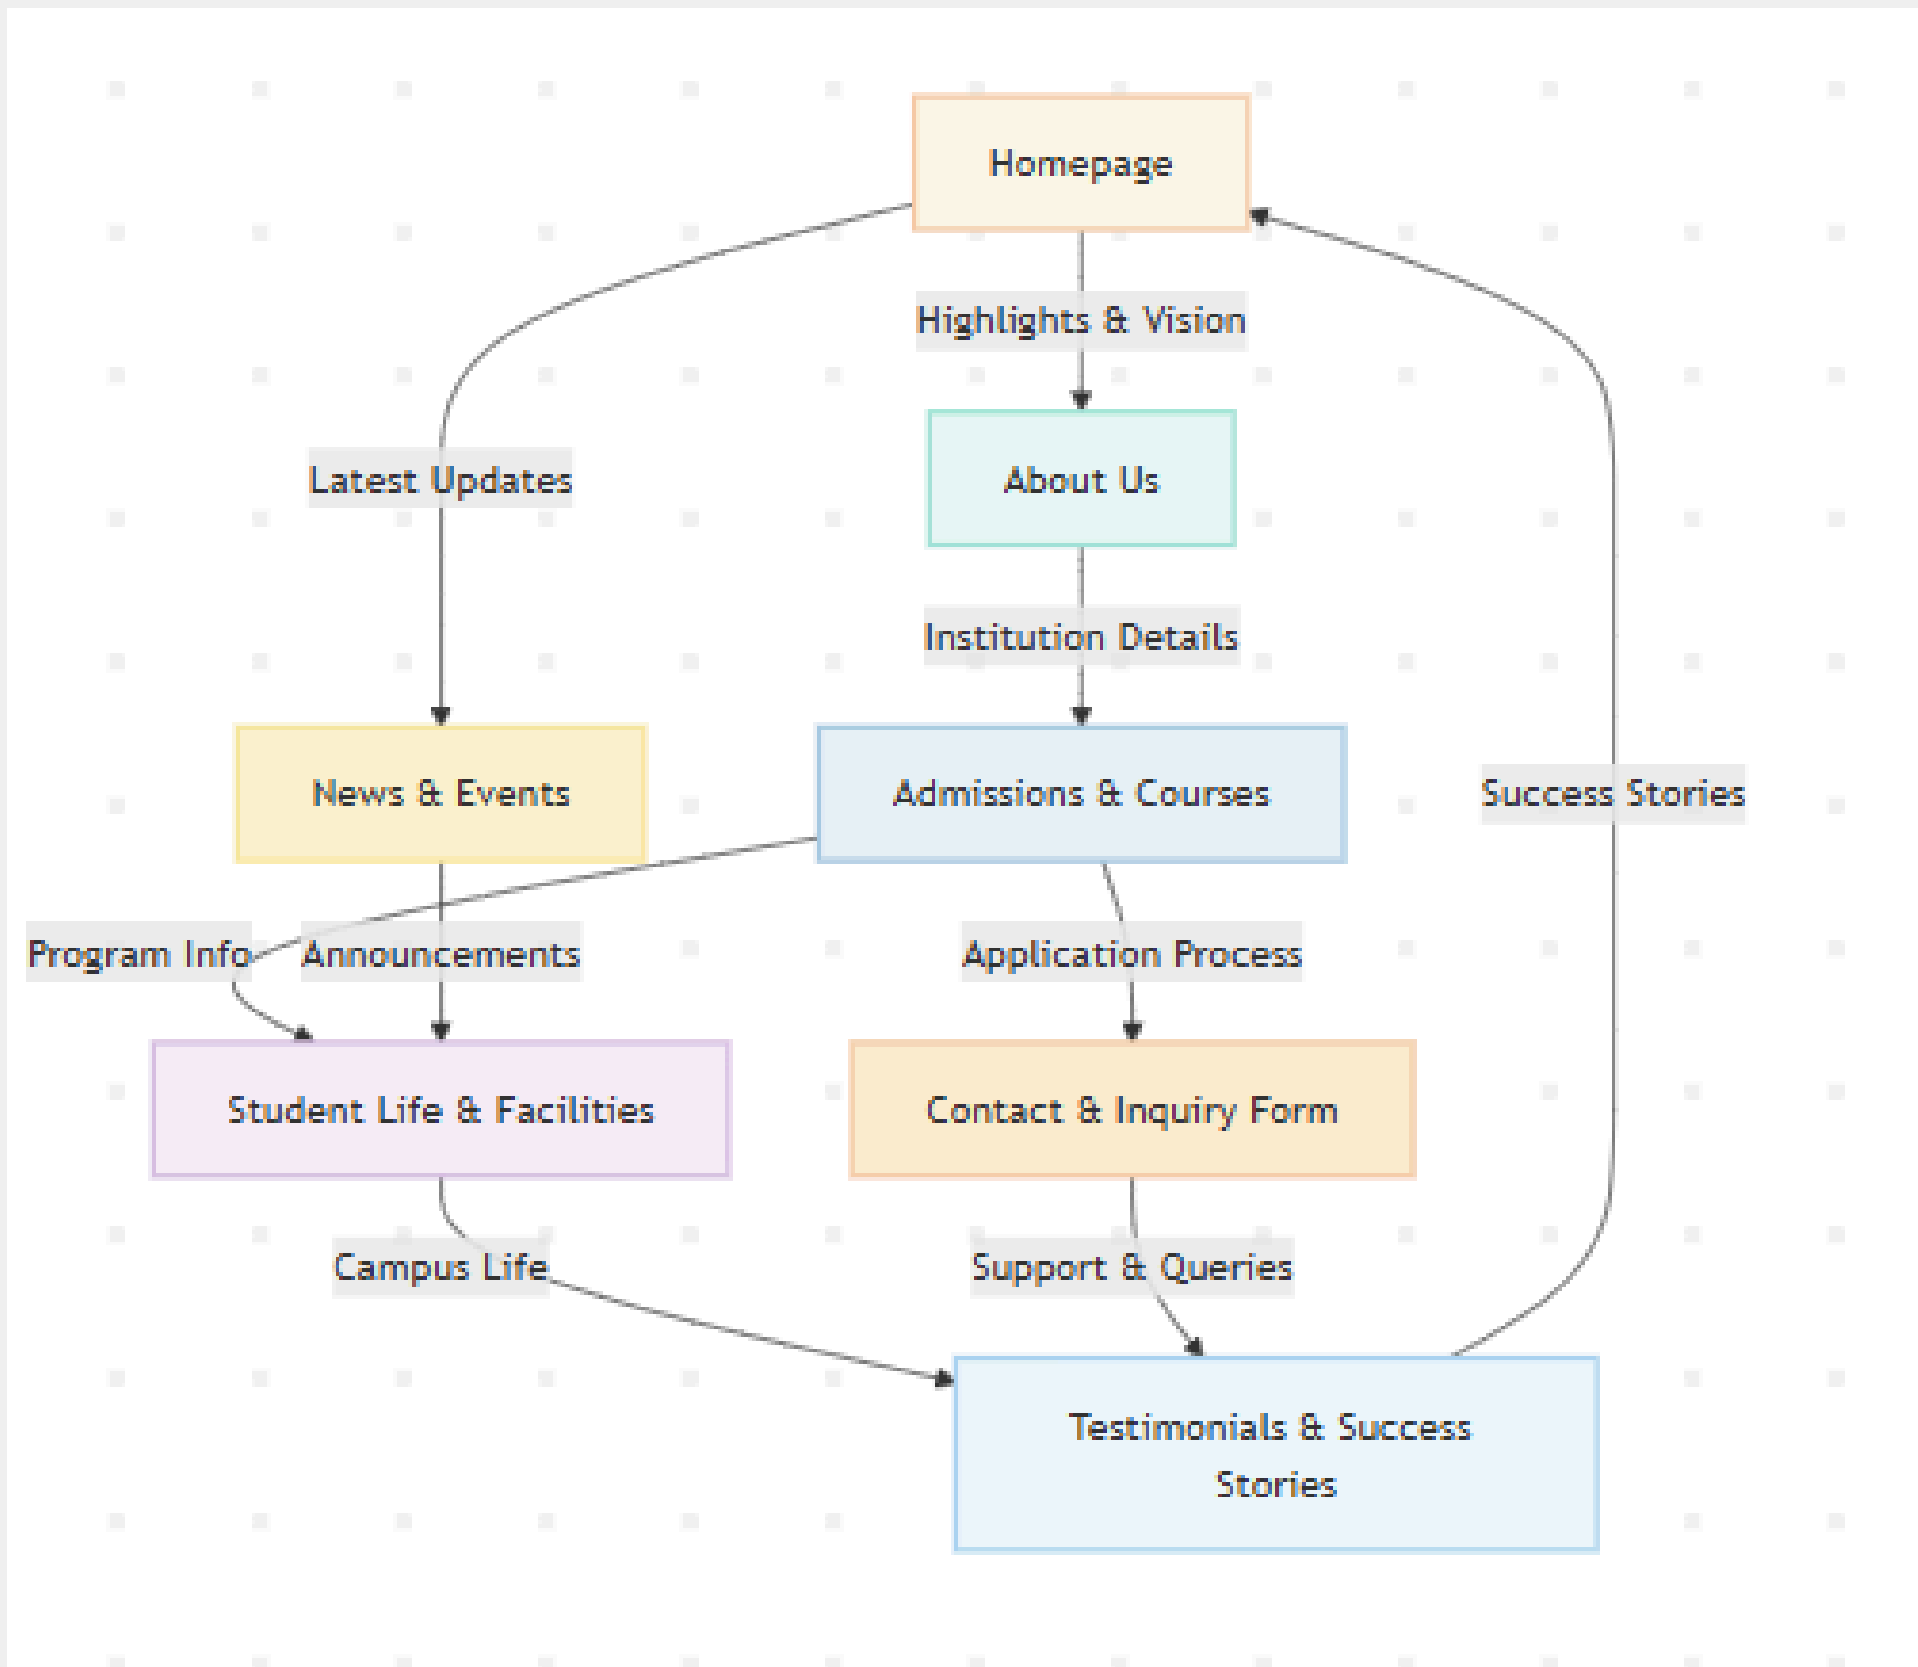

The website features a mobile-responsive design, ensuring a seamless experience across all devices.

Screenshots

We built our website using TIRAM.AI, a no-code platform, by providing precise prompts to generate the required web pages based on our problem statement.

System design

The TBG5 College Website workflow ensures a seamless user journey, starting from the Homepage, which highlights key aspects of the institution and connects to essential pages like About Us, Admissions & Courses, and News & Events for relevant information. Users can explore Student Life & Facilities, read Testimonials & Success Stories, and easily communicate through the Contact & Inquiry Form, creating an engaging and informative experience.
